Est 2019

The Kalpana is packed with all the features you need to manage your garden

**Quick Installation**- No more hassle of tedious wiring and calibrating. Quick mode lets you plug and use your Kalpana in under 30 minutes.

**Fully customizable** - Climbers? Creepers? No problem! Zone your plants the way you want and schedule watering so you can have your garden your way.

**Vacation mode** - Travel in peace and come home to a green lawn, blooming flowers and fresh herbs! Vacation mode lets you monitor and water your garden from your smart phone no matter where you are in the world.

**Presets** - Our state of the art app comes with thousands of presets so each plant zone only gets the recommended amount of water ensuring longevity of plants and sustainable water use.

**Leak detection**- Don't let a drop of water go to waste with our smart leak detection system

**Cost effective** - Rest well! With our worry-free approach to part replacement, repairs are now easier than ever all while you save big on water and electricity.

**Drought mode**- Avoid over watering by turning off non-essential zones during drought season
